

My ECO Barrel™

Climate LLC developed the Original soft-sided rainwater harvesting barrel A BPA-Free Product

Best Warranty: 1 year Limited vs. 90-days or less for competing products

Structurally Superior to competing products:

- * 0.022in. (.55mm) **ClimaFabric™** a UV resistant PVC fabric with high frequency welded seams vs. competing products at .010in. (.25mm) or thinner and chemical seams
- * **ClimaStruts™** are one-piece struts made with our proprietary formula for superior strength and are UV resistant.
- * A near 360-degree double sewn synthetic dual zipper and screened inlet in the lid
Inlet doubles as a vent or overflow if the overflow is used as a hose inlet from a rainwater harvesting pre-filter
- * Separate 1/4-turn ball-valve drain, 1/4-turn spigot, and overflow assemblies.
- * Spigot is 10in. (254mm) high so watering cans fit without the need to place barrel on a pedestal
- * Screen cap filters on overflow, spigot and drain valve - prevent debris from blocking flow and inhibiting insect or rodent entry into barrel
- * Drain is both threaded and comes with quick-connect insert with O-ring-for quick connection hose.
- * ALL fittings come with dual rubber washers, so no added sealant is necessary.

Highly Portable: Light-weight: 10lb (4.536kg.) shipping weight – not heavy or bulky like competitors

Foldable Design: Compresses easily for storage or transport

Easy Assembly: Within minutes and needs no pedestal with all parts included and no tools necessary

Exceptionally Durable: Aforementioned 0.022in. (.55mm) thick ClimaFabric™ that is UV resistant and antibacterial which increases durability with a synthetic zipper and double-sewn Corrosion resistant fittings

Easy Maintenance: Clean with mild dish soap; zippered lid facilitates internal cleaning
